## **PART III: Workout the following (25 points)**

| 1. | What is the result of thwe following HTML code(3 points).                                 |        |                  |             |
|----|---|--------|------------------|-------------|
|    | html  |        | Your answer here |             |
|    | <html></html>   |        |                  |             |
|    | <head></head>   |        |                  |             |
|    | <title>My Webpage</title> <body> <h1>Welcome to my page</h1> This is my home page </body> |        |                  |             |
|    |   |        |                  |             |
|    |   |        |                  |             |
|    |   |        |                  |             |
|    |   |        |                  |             |
|    |   |        |                  |             |
| 2. | Complete the Number System table below (12 points) .                                      |        |                  |             |
|    |   |        |                  |             |
|    | Decimal   | Binary | Octal            | Hexadecimal |
|    |   | 0000   |                  |             |
|    |   |        | 7                |             |
|    | 10  |        |                  |             |
|    |   |        |                  | FFFF        |
|    |   |        |                  |             |
| 3  | Crreate any web page you like using HTML or (Html and CSS) (5 points)                     |        |                  |             |
|    |   |        |                  |             |
|    |   |        |                  |             |
|    |   |        |                  |             |
|    |   |        |                  |             |
|    |   |        |                  |             |
|    |   |        |                  |             |
|    |   |        |                  |             |
|    |   |        |                  |             |
|    |   |        |                  |             |
|    |   |        |                  |             |
|    |   |        |                  |             |
|    |   |        |                  |             |
|    |   |        |                  |             |
|    |   |        |                  |             |
|    |   |        |                  |             |
|    |   |        |                  |             |
|    |   |        |                  |             |
|    |   |        |                  |             |
|    |   |        |                  |             |
|    |   |        |                  |             |
|    |   |        |                  |             |
|    |   |        |                  |             |
